

Hello Homeowners,

The irrigation schedule for 2022 is posted on The Shores website at <https://theshoreseagle.com/>. Please be sure to set your system consistent with your homes' assigned time. The 5-zone approach is the way the system was designed to operate. If too many homes/areas are watering at the same time the system will not function as designed.

As was discussed at the HOA Meeting on March 29, the snow pack is low and irrigation water shortages are projected. In an effort to conserve water for later in the season, a voluntary reduction in irrigation system use is requested. Specifically, it is requested that watering of lawns and landscaping be limited to 3 days/week and no more than every other day. This approach will not adversely impact lawns or landscaping.

The city of Nampa held a meeting last week to address the anticipated water shortage, and included a presentation from Jos Zamzow, with tips on how to best water lawns in preparation for a drought year. Here is a link to Jos' comments: <https://zamzows.com/blogs/lawn-garden/water-conservation>. This is great and useful information.

Last, there was a slight delay in servicing the irrigation system prior to turning it on. This in turn delayed the annual system flush that is performed to help reduce homeowner filter plugging. Weather permitting our team of homeowner volunteers are hoping to flush the system on this Friday April 15, and the irrigation system will be turned on once the flush is completed. If there is a weather delay, the flush will be performed on Monday April 18th, and the system turned on once the flush is

completed. We could still use a few volunteers, and if you can assist, please contact Shelli at Sentry Management at [sbartlett@sentrymgt.com](mailto:sbartlett@sentrymgt.com).

Thank you,  
The Shores HOA Board
